

NOV 13 1978

Mr. Robert Lynn
The Anaconda Company
Uranium Division
P.O. Box 638
Grants, New Mexico 87020

Dear Mr. Lynn:

According to the USGS Mine Examination Report of November 1, 1978, operations are being continued in the PW-2 and PW-3 areas using blasting methods due to the mechanical breakdown of the Alpine Miner. The Tribal Council of 1977 was informed that no blasting techniques would be used in this area due to the close proximity of the Paguate Village.

Your attention to this matter and corrective action will be appreciated.

Sincerely,

PUEBLO OF LAGUNA

S/ Floyd R. Correa /sr.
